

Law for the People

**20%**

of Filipino workers reported experiencing harassment at work in 2023, underscoring the pressing need for reform (Around a Fifth of Filipino Employees Have Experienced Workplace Harassment — Poll, 2023).

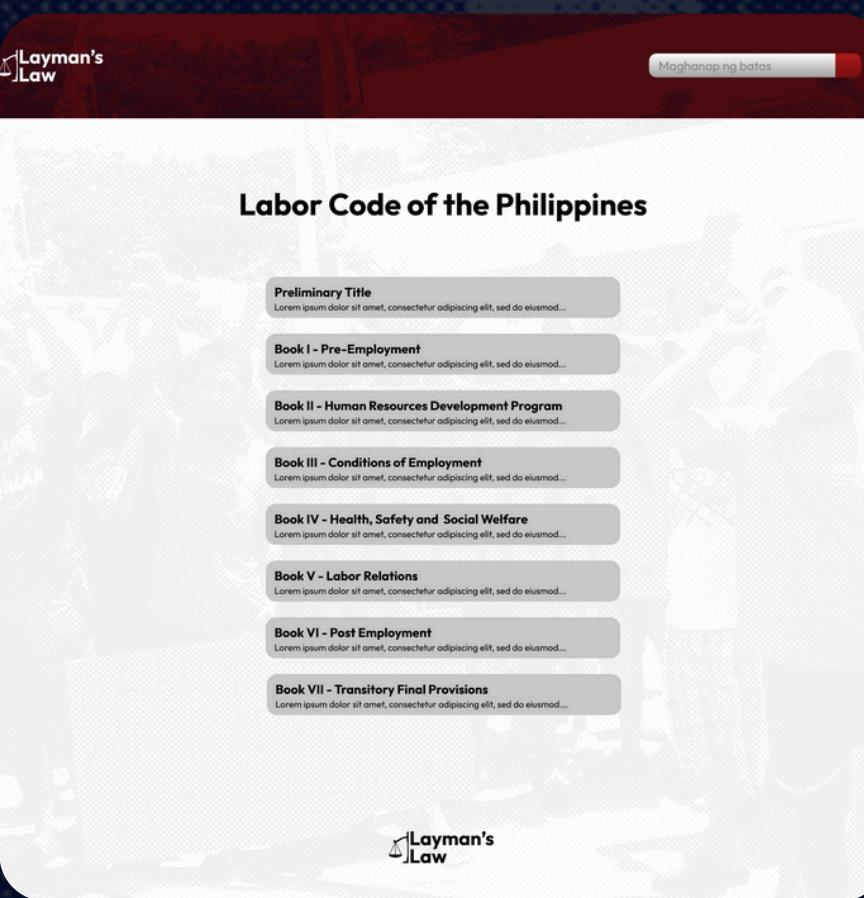

## Overview

Layman's Law, also known as SakloLAWS, attempts to address the issue of Filipino workers' limited access to legal knowledge and assistance, particularly with regard to complicated legal matters.

- Simplified Legal Summaries: Authored, submitted, and reviewed by licensed legal professionals.
- Verified Translations: Local translations of legal summaries for better accessibility.
- Interactive Forum: Direct engagement with lawyers for specific queries and concerns.

# Layman's Law has two main features:

Law  
Summaries/Wiki

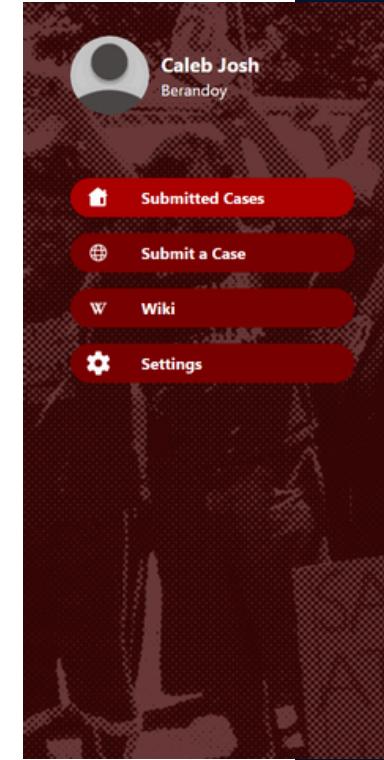

Client-to-Lawyer  
consultation

# Client-to-Lawyer Consultation

Anyone is able to reach out to lawyers, and lawyers are free to give legal advice to potential clients.

- Clients can post their concerns on the app.
- These concerns are potential “cases” that lawyers can accept.
- Lawyers can see the entire list of these posts and can freely choose which of these “cases” they want to accept/offer their help to.

Lawyer Side

# Law Summaries/Wiki

Main functionality is to provide easy-to-digest law summaries for people in the workforce. It is based on the Labor Code of the Philippines. This part of the website consists of laws that are summarized in English, translated to Tagalog, Bisaya and Waray.

# Recommendations

Layman's Law can be improved by implementing:

- AI Integration: Incorporate AI features for improved user interaction, such as chatbots for quick assistance and natural language processing for better understanding of user queries.
- API Integration for Auto-Verification: Develop an API to streamline the verification process by connecting to Supreme Court databases, reducing manual effort.
- Email Verification and Captcha: Enhance security measures by requiring email verification and implementing Captcha to prevent unauthorized access.
